University of Michigan
Computer Engineering, B.S.E.
Fall 2010 – Fall 2013

Creating software that will change the world.

EXPERIENCE

Learning A-Z – Ann Arbor, MI
Software Engineer
2014-Present
Software Engineering Intern
2010-2013

I bring web applications to life in all areas of our business. I helped design transition animations and other UI features in the Raz-Kids iOS application. I designed and built the Parent Portal (http://www.raz-kids.com/parents), a sister site to http://www.raz-kids.com. I help maintain our custom sales interface.

CAEN Instructional Technology – Ann Arbor, MI
Student Software Engineer
2012 – 2013

Led a project with two other students to create a new classroom equipment monitoring service. We chose Node.js server technology and utilized live server-client socket connections.

AWARDS

Winner,
Most Polished App
PennApps Hackathon
Spring 2013

BetterAuth – Our project streamlines the process of two-factor authentication for a better user experience. Along with two other programmers, we built a Google Chrome plugin, Python server, and Android application within 48 hours.

PROJECTS

SetMine

A music-streaming service for EDM listeners. Our product is available on the Web and on iOS/Android. My roles include Android developer, server admin and backend Web developer.

http://setmine.com

Golf BMP Solutions

An informational site for Golf BMP Solutions, a business based in Florida which aids golf courses in following federal regulations.
The site is built using Node.js and themed with Twitter Bootstrap.
